1.计算属性的基本属性:(computed)

```
<div id="app">
   <!-- 之前的方法 -->
   <h2>{{firstName + ' ' + lastName}} </h2>
   <h2>{{firstName}} {{lastName}} </h2>
   <h2>{{getFullName()}} </h2>
   <!-- 计算属性方法 -->
   <h2>{{fullName}}</h2>
</div>
<script>
   const app = new Vue({
       el: '#app',
       data: {
           firstName: 'Lebron',
           lastName: 'James',
           books: [{ ···
       // computed:计算属性
       computed: {
           fullName: function() {
               return this.firstName + ' ' + this.lastName
           },
       methods: {
           getFullName() {
               return this.firstName + ' ' + this.lastName
       },
```

2.计算属性的复杂操作

```
// computed:计算属性
computed: {

fullName: function() {

return this.firstName + ' ' + this.lastName
},

totalprice: function() {

let result = 0

for (let i = 0; i < this.books.length; i++) {

result += this.books[i].prices
}

return result
}
```

3.计算属性的setter和getter

每个计算属性都包含一个getter和一个setter

- 下面的例子中,我们只使用getter来读取
- 某些情况下,也可以提供一个setter方法(不常用)
- 在需要写setter的时候,代码如下:

4.计算属性的缓存

methods和computed的区别:

计算属性会进行缓存,如果多次使用时,计算属性只会调用一次;methods会调用多次 开发中多用computed

```

           Download the Vue Devtools extension for a better development experience: https://github.com/vuejs/vue-devtools
             You are running Vue in development mode. <a href="vue.js:906">vue.js:906</a>
Make sure to turn on production mode when deploying for production. See more tips at <a href="https://vuejs.org/guide/deployment.html">https://vuejs.org/guide/deployment.html</a>
